

Senior QA Engineer / Software Developer in Tests

Software engineer with 10+ years of experience, primarily as a QAE and SDET. Proven ability to design, develop, and implement test automation, test architecture, test management, and continuous integration solutions. Familiar with Agile software development and the software development life cycle.

Skills

- Technologies: JavaScript, Typescript, bash, python
- Tools: Git, NPM, Jira
- E2E testing: Playwright, Cypress, Karate, Selenium, WebdriverIO, Cucumber, Appium, Postman
- Performance testing: k6, JMeter, Gatling
- CI: GitHub Actions, Jenkins
- Cloud: Azure, AWS, Terraform, Plumin, Helmfile, LocalStack
- Containerization: Docker
- Databases: MongoDB, DynamoDB, SQL
- Observability: AWS CloudWatch, New Relic, PagerDuty, Loz.io, Splunk

Certification

- ISTQB - Foundation level

Work experience

Senior QA Engineer at Galenica (Bern, Switzerland)

2025 (January) - Present

Galenica is the leading healthcare provider in Switzerland, with the largest pharmacy network and wholesale distribution in the country.

Senior QA Engineer for the Care Portal frontend and backend, owning test strategy, test automation frameworks, release validation, and production quality across multi-brand, multilingual customer journeys.

- Built and maintained automated UI, API and end-to-end coverage with Vitest, Cypress, Playwright, and k6, including a visual regression suite.
- Designed k6 load tests to validate performance and scalability of the Care Portal
- Integrated test suites into GitHub Actions CI/CD as release gates, improving regression detection before production.
- Supported platform delivery with Helm/Helmfile and releases to AKS.
- Implemented observability as code with Pulumi and New Relic (dashboards, alert policies, NRQL queries) to monitor production health and traffic.
- AI Assisted using copilot to generate test cases and test data, improving test coverage and reducing manual effort.

QA Engineer at Ryanair Labs (Full remote)

2024 (January) - 2025 (January)

Ryanair Labs is the technology hub of Ryanair, Europe's largest airline group, building the digital products used by millions of passengers.

- Developed and maintained E2E and API test automation for the web eCrew app.
- Integrated automated test suites into the CI pipelines.
- Collaborated with distributed teams in an Agile environment.

Software Developer in Tests at Dazn (Amsterdam, Netherlands)

2019 - 2023 (November)

DAZN is a global sports streaming service that offers live and on-demand content.

- Launched and maintained the Sports Logos Manager service, which enables DAZN to support high demand for sports logos across the platform. The service is integrated with multiple front-end chapters, and it is highly scalable and distributed across multiple regions. It solves the problem of keeping competition logos up to date with minimal editor effort, ensuring that logo images are always resilient.
- Developed a test solution using LocalStack to eliminate the need for AWS resources (saving money) and simulate concurrent users.
- Incorporated performance testing into the software development life cycle to detect performance regressions in each release.
- Developed GitHub workflows to automate deployments and package releases.
- Developed front-end test automation solutions using Playwright and Cypress.
- Developed a backend test automation using nest.js, jest and docker.

QAE at ESAILORS (Hamburg, Germany)

2017 - 2019

Lotto24 is the leading German lottery provider on the Internet.

- Working primarily supporting backend microservices.
- Create and maintain automated tests framework using groovy and selenium.
- Create a test framework to validate emails across all platform.
- Maintain and create pipelines workflows in Jenkins.
- Analysis test reports.
- Create test stories in a scrum environment.

QAE at E.NEAR (Lisbon, Portugal)

2015 - 2017

E.Near is a software development company that provides nearshore services to clients in Europe.

QAE at AFRICA INTERNET GROUP (Porto, Portugal)

2014 - 2015

Jumia is the leading pan-African e-commerce platform.

Software tester at FARFETCH (Porto, Portugal)

2013 - 2014

Farfetch is an online luxury fashion retail platform.

Education

- Universidade de trás-os-montes e alto douro (UTAD) - Technology, Information and Communication
